FINANCE AND TRADE.

Suspension of the Banks Last Week—Country Movement Still Slow.

Large Remittances to New York—Clearings of the Week.

The Produce Markets—Steadiest—Pork and Lard Again Lower.

Grain Active—Wheat and Barley Stronger—Corn and Oats Ease.

FINANCIAL.

The transactions of the banks last week were not heavy. The status of the City National Bank, however, was not so favorable, and some further difficulties, as its course in some respects had awakened suspicions of its situation. The Board of Trade operators were applicants for loans which to meet their obligations on the 1st, but the total of these was not as large as was expected. The loan was immediately paid off, and the bank is still solvent. The case which follows the payment of country paper, and of city paper, dependent on country collections, has not yet been experienced. A large proportion of the means of the banks are still held in country paper, or city customers waiting for country remittances. According to all reports, the country roads have dried enough to permit produce to be forwarded, but this expected movement is now postponed. At this time no remittance was made by the farmers who will not send to market at a loss. As soon as this is done it will forward for realization, a large part of the loans now employed in carrying them will be released. Discounts are greater, a little later than a fortnight ago, but the loan market is steady, and the surplus of loanable resources and red premium is still large.

On the street notes are 7½ per cent. Good paper is in demand.

New York exchange was still between 100 and 100½ per cent.

The following is the clearing of the Chicago banks for the week as reported by Manager D. H. Hale, of the Chicago Clearing-House:

THE NATIONAL BANK OF THE STATE OF NEW YORK.

The Bank of the State of New York was Thursday received a communication from the Clearing-House at the reduced capital of \$100,000,000, and will be entitled to the initiation fee, as in the case of a new bank. It takes its old number on the list, and will clear on Monday. Business was assumed at the bank on the same day, and the proprietors very cheerful. The institution has been in existence since March 31.

Wheat and Corn.

Wheat currency is still scarce and unmarketed, as shown by the weekly quotations obtained from money dealers and brokers. Farmers were buying silver coins from 4½ to 5½ per cent discount and selling at 5½ to 6 per cent premium. The average buying price was a trade under 5½ per cent discount, and the average selling price was not quite 2½ per cent discount. The creditable rates have varied recently to 4½ to 5½ per cent discount for silver coins.
